Office Action Summary

Application No.

09/871,398

Applicant(s)

LIU ET AL.

Examiner

Jacob Y. Choi

Art Unit

2875

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 5/30/2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lahos (USPN 5,584,561) in view of Gelormino et al. (USPN 5,624,175).

Regarding claim 1, Lahos discloses a first fastening mount (25, 27) fastened to the wheel (16) of a vehicle and provided with a first magnet (20) fastened thereto, a second fastening mount (25, 27) fastened to the wheel (16') of the vehicle and provided with a second magnet (20) fastened thereto, and a coil box (18) fastened to a one side

Art Unit: 2875

of a fork tube (14a, 114a) wheel of the vehicle and formed of a plurality of coils (32) and light emitting diodes (36, 136, 140, 142) whereby the coils (32) bring *about* an electric potential at the time when the coil (32) is turned while the wheel in motion to cut through a magnetic field effected by the first and second magnets, the electric potential enabling the diodes to emit light (column 3, lines 10-20 & column 3, lines 40-60).

Lahos failed to disclose the specific locations of magnet and coil box parts.

Gelormino et al. teaches lighting device containing a coil box mounted on the wheel not to the frame structure of the bicycle (Figure 4), as disclosed teachings of Lahos.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to reverse the working parts of magnet and lighting device containing the coil box, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art. *In re Einstein*, 8 USPQ 167. Also, by reversal of the following essential component would create a moving light structure which creates an ecstatic appearance.

Note: claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974).

Regarding claim 2, Lahos in view of Gelormino discloses the claimed invention, explained above. In addition, Lahos discloses the coils of the coil box are arranged in parallel connection (Figures 6, 7), wherein the diodes are respectively connected to the coils.

Art Unit: 2875

Regarding claim 3, Lahos in view of Gelormino discloses the claimed invention, explained above. In addition, Lahos discloses the coil box is further formed of a plurality of capacitors (206, 214) whereby the capacitors are connected to the coils.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Roberts (USPN 4,225,848) – electric lighting system for bicycle wheels

Seki et al. (USPN 5,128,840) – bicycle luminaire

Schwaller (USPN 5,857,762) – bicycle lighting system and generator

Copeland (USPN 5,015,918) – bicycle single-wire lighting system with steady-flashing-reflector rear warning device

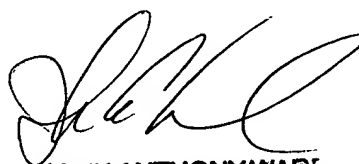

Frosythe et al. (USPN 6,832,847) – cycle wheel safety lighting system

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Y. Choi whose telephone number is (571) 272-2367. The examiner can normally be reached on Monday-Friday (10:00-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
